Check out the latest Xuno enhancements and new features!

We're thrilled to announce some fantastic new updates to Xuno, launching this evening!

We are excited to introduce a new feature in Xuno that allows parents to request the use of government-provided funds or allowances, including the Camps, Sports, and Excursions Fund (CSEF), the School Saving Bonus (SSB), and the Back to School Voucher (BSV), to cover the costs of their child's camps and excursions.

Key Features:

- **Payment Assistance Requests:** Parents can now easily request to use eligible government funds or allowances to cover camp and excursion costs directly through the Xuno platform.
- **Seamless Integration:** Once submitted, requests will be reviewed by the school, ensuring a smooth and efficient process.
- **Increased Flexibility:** This feature allows families to utilise available financial support for extracurricular activities.
- **Streamlined Process:** Requests can be made with just a few clicks, saving time for both parents and school staff.

This new feature is designed to simplify the process, making it easier for families to access available funding for their child's extracurricular activities.

For more information on how to set this up, please see this [article](#).
